

POLYCARBONATE SAFETY GLASSES – REF. 210

TECHNICAL DATA SHEET :

Product Name: Safety Glasses

Model Number: 210

1. PRODUCT DESCRIPTION :

Safety glasses made of high-impact polycarbonate, designed to protect the eyes against impacts, liquid splashes, dust, and UV radiation. Suitable for industrial environments, construction, laboratories, and workshops.

2. FEATURES & BENEFITS :

- High resistance to impact and abrasion.
- Coated lenses for extended service life.

3. TECHNICAL SPECIFICATIONS :

| Feature | Description |
|----------------|--|
| Lens Material | : Optically clear polycarbonate |
| Frame Material | : High-strength polycarbonate or nylon |
| UV Protection | : 99.9% UVA/UVB protection |
| Lens Coating | : Anti-scratch and optional anti-fog |
| Design | : Lightweight, Clear PC |
| Standards | : EN 166 – EN 170 Eye protection |
| Weight | : Approx. 25–35 g |

4. KEY FEATURES :

- Full protection against particles and splashes
- Comfortable design for prolonged use
- Compatible with most hearing and respiratory protection equipment.

5. TYPICAL APPLICATIONS :

- Construction and civil works
- Manufacturing industry
- Chemical and biological laboratories
- Carpentry and woodworking
- Metalworking and grinding/cutting operations
- Industrial maintenance and cleaning
