

## POLYCARBONATE SAFETY GLASSES – REF. 220

### **TECHNICAL DATA SHEET :**

Product Name: Safety Glasses

Model Number: 220

### **1. PRODUCT DESCRIPTION :**

Safety glasses made of high-impact polycarbonate, designed to protect the eyes against impacts, liquid splashes, dust, and UV radiation. Suitable for industrial environments, construction, laboratories, and workshops.

### **2. FEATURES & BENEFITS :**

- High resistance to impact and abrasion
- Coated lenses for extended service life
- Full protection against particles and splashes.

### **3. TECHNICAL SPECIFICATIONS :**

Feature	Description
Lens Material	: Optically clear polycarbonate
Frame Material	: High-strength polycarbonate or nylon
UV Protection	: 99.9% UVA/UVB protection
Lens Coating	: Anti-scratch and optional anti-fog
Design	: Lightweight, Clear PC
Standards	: EN 166 – Eye protection
Weight	: Approx. 25–35 g

### **4. KEY FEATURES :**

- Comfortable design for prolonged use
- Compatible with most hearing and respiratory protection equipment

### **5. TYPICAL APPLICATIONS :**

- Construction and civil works
- Manufacturing industry
- Chemical and biological laboratories
- Carpentry and woodworking
- Metalworking and grinding/cutting operations
- Industrial maintenance and cleaning
- Padded ends temples for comfort
