

Description

High-performance EN 3 door closers designed to operate effectively under the most demanding conditions.

Certified in accordance with the EN 1154 standard.

Compact device that ensures doors close smoothly and quietly. When installed at the top of a door, it utilizes a hydraulic mechanism to regulate the speed and force at which the door closes.

Door closers prevent doors from slamming shut, enhancing their convenience and safety for everyday use in homes, offices, and commercial spaces.

These unobtrusive devices improve security, energy efficiency, and overall convenience by managing the way doors close.
